Cosmetics Supplies - Skin Food Therapy

Herbal Face Mask

Beauty must come from both the inside and the outside. Dull, lifeless skin will not be able to withstand the environmental harshness without further deteriorating. Tonic herbs are the best defense against most negative environmental forces, because they build the body's own ability to fight and resist damage, so it can remain healthy.

However, for the ultimate beauty, it's also necessary to nourish and protect the skin from the outside. These tonic herbs plus a few other wonderful natural substances, have the amazing capacity to prevent aging and to protect the skin from environmental damage.

Here are some of the herbs used by the wealthiest and most beautiful women in the orient to

Pointer Pulse

Hand Held Point Detector, Pulsed Laser and Pulsed T.E.N.S.

The POINTER PULSE is an accurate and easy to operate hand held trigger point locator which incorporates an effective push button stimulation feature (10Hz). It may be used for the immediate treatment of the point or area right after its detection. In addition, a visible, coherent, bright red 650nm wavelength laser beam is emitted when switching on the laser output. The laser output can be selected as a continuous or pulsed output, with a pulsed frequency of 10Hz.

Technical Specification:

For Electric Stimulation

Channel: one

Output Current: 0-2 mA adjustable Micro current (blue zone on dial)
2-45 mA adjustable (black zone on dial)
± 20% (on 500 ohm loading)

Pulse Rate: 10 Hz (fixed) ±20%

Pulse Width: 260µS (fixed) ± 20%

Pulse Shape: Biphasic Square Wave with a negative spike

Wave Form: Continuous

For Laser Stimulation

Laser Wavelength: 650nm

Max. Power Output: 5mW, solid state diode

Pointer Plus Excel II

Pointer Excel II is a newly designed, accurate and easy to operate hand held point locator which incorporates an effective push button stimulation feature. This may be used for the immediate treatment of point or area following its detection.

It features a digital display to show the frequency of stimulation during operation and numerical display to show the sensitivity of detection during the location of acupuncture points.

This Unit is fully equipped with distinguished features such as polarity change-over switch, frequency selection and micro current stimulation etc. It is one of the most innovative hand held stimulators available in the market.

Channel: one

Output Current: Micro current, blue zone on dial (0-2 mA)
2-22 mA adjustable (black zone on dial)
± 20% (on 500 ohm loading)

Pulse Rate: 1–16 Hz (adjustable) 20%

Pulse Width: 220µS ± 20%

Pulse Shape: Biphasic Square Wave

Wave Form: Continuous

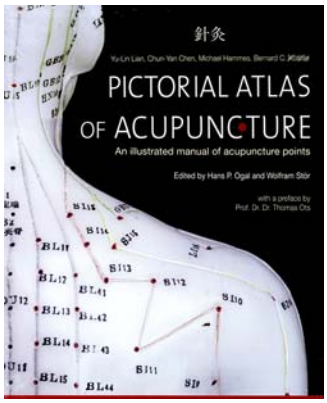
The Pictorial Atlas of Acupuncture



Assembled by a team of Chinese and German professionals, this large atlas, luxuriously produced in full-color, is a profusely illustrated manual of acupuncture points: those on the main channels, as well as the extraordinary vessels and extra points (409 total). Three different types of illustrations are provided for each set of points: a graphic which indicates body location; an overview of channels which depicts the point in the context of its pathway; and a photograph showing the needle in position. The text that accompanies the illustrations includes descriptive of location, needling technique, actions, indications, and precautions.
In addition to this excellent information, the text also provides important material concerning measurement techniques, needling techniques, depth and direction of needling, obtaining the qi sensation, needle stimulation, and point categories. With an agreeable price as well, it is sure to be a worthwhile investment for student and practitioner alike.

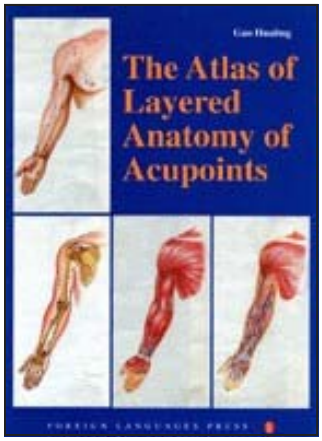
The Atlas of Layered Anatomy of Acupoints



Drawing on 44 years of teaching and studying both acupuncture and human anatomy, the author presents a compilation of 70 full-color illustrations that depict the layered anatomy of the body and denote the acupuncture points in relation to the skin, muscles, blood vessels and nerves, organs, and skeleton. Additionally, the author describes the points of the 14 channels and reviews each point in terms of its indications, point location, patient posturing, and the direction, angle, and depth of insertion for needling. He further lists channel-BY-channel precautions in acupuncture treatments and selected points for treatment of 117 Western-named common diseases.

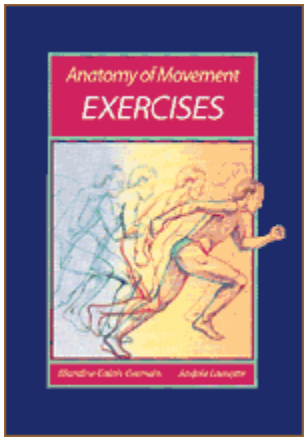
Anatomy of Movement EXERCISE

By Blandine Calais-Germain, Andrée Lamotte



282 pages, 7" x 10"
600 photos, 200 drawings
Smyth-sewn softcover

In this companion volume to *Anatomy of Movement*, the authors describe and illustrate, through hundreds of photographs and drawings, a comprehensive series of exercises involving the most common movements of the body.

The exercises were chosen on the basis of their effectiveness and harmlessness. Some are designed to focus on strengthening a particular region or muscle group, others the entire body. Each exercise prepares the body to respond well to the demands of particular movements. Together they serve as a basis for the more specialized movements associated with various physical disciplines and therapies.

Presentation follows the sequencing in *Anatomy of Movement*. For each body region the authors describe characteristic movements; potential sources of stiffness or laxity and how to detect, prevent and overcome them; how to strengthen specific muscles or muscle groups; and how to coordinate movements. This is followed by "practice pages" on which specific exercises are demonstrated.

ENGLISH-CHINESE Applied Anatomical Atlas of acupoints

By Yan Zhenguo

This book is a large collection of color photographs of the meridians, acupoints and **cross sectional** anatomic structure of the human body. The treatment of acupuncture and moxibustion takes effect through needling the acupoints located on the body surface to dredge the meridians and regulate qi and blood. Hence correct location of acupoints and familiarity with their anatomic structure is key to the therapeutic effect of acupuncture and moxibustion.

The essential guide to Acupuncture in Pregnancy & Childbirth

By Debra Betts

In this beautifully-designed clinical textbook, acupuncturist Debra Betts draws on more than 15 years of experience specializing in the use of acupuncture during pregnancy and childbirth. Acupuncture is an ideal form of treatment in that it offers women drug-free relief from a multitude of problems that can arise during this time. Even for conditions like morning sickness, sciatica and symphysis pubis pain, which are often regarded as part of a normal pregnancy, acupuncture can not only improve a woman's quality of life, but also prevent them from becoming serious enough to necessitate medical treatment.
Pre-birth acupuncture can enhance an efficient labor, and the teaching of acupressure to a woman's partner or caregiver can make a great difference in the levels of pain experienced during labor. During labor itself, acupuncture can play a role in actively reducing the level of medical interventions such as inductions, forceps deliveries, and caesarean sections. Acupuncture can provide effective treatment for disorders such as pregnancy-induced hypertension and posterior presentation, and help induce labor, allowing women to achieve natural childbirth.
Each topic is presented from both a Western and traditional Chinese medical perspective. The discussion of clinical treatments reflects what has actually worked in practice for the author and the midwives she has worked with. The text is illuminated with clinical case histories, illustrations, and color photographs.

QI HEALING

By Ken Cohen

This comprehensive double video set introduces and demonstrates how to heal and energize yourself and others by releasing stagnant qi, our vital life force, to detoxify internal energy and rebalance the flow of healthy qi throughout the body. The first video session is "How to Be a Healer: Preparation Exercises and Wellness Energy Treatments," demonstrating how to build a personal reservoir of qi to become an effective healer by learning mental clarity exercises, organ cleansing methods, and the cultivation of qi flow through the hands and fingers. A brief history of qi introduces the video, followed by a demonstration of the stance of power, standing meditation, energy points and channels, balancing yin and yang meridians, waving technique and one finger Zen. Video two, entitled Restoring Balance: Energy Assessment and Treatment demonstrates how to focus qi for maximum health and healing using hands-on assessment methods including sword fingers and circling hands. Specific therapeutic hand treatments are demonstrated with healing qi for pain, low energy, and tension, how to asses qi in others, intuitive qi assessment, and quick qi recharge. An accompanying study guide booklet outlines the philosophy and techniques demonstrated in the video, including qigong self-healing, external qi healing, commonly asked questions and a glossary of qigong terminology. This video set is an essential tool for anyone looking to access the power of their own self-healing qi or extend their conception of qi to become a healer for others.
